Summary

Technical Game designer with over 20 games developed ranging from PC games to Controller & VR, mainly using Unity & C#. I've brought multiple games to market both solo & in team. Outside work I still bury myself in games, actively working on new projects & marketing them on social media.

Relevant Experience

Game Developer Internship

@ AlterEyes (VR Studio – Hasselt) Feb 2025 - June 2025

Prototyped a VR puzzle game based on an internal concept, using both programming and design skills to prove its potential. This prototype impressed them and led to the formation of a team, including other interns, to make a full version, which was completed by the end of the internship.

- Brought a VR game from concept to prototype & then led a small team to create a vertical slice.
 - Did R&D into emerging platforms & technologies the company was interested in. Designed concepts & developed prototypes to showcase what they're capable of.
 - Playtested their in development games to give targeted feedback from a developer's POV.
-

Indie Game Developer

2020-present

- Released 1 solo Steam title & working on a second release in a team.
 - Invited to Xbox Game Camp, where I received targeted feedback from Xbox employees.
 - Participated in FGH Support Program, which let me learn from experienced developers & founders.
 - Built a library of reusable systems carried across projects, applying OOP principles to write clean, modular code.
 - Won Xbox Gamejam & got second place in a \$5K gamedev competition, which garnered 550K views.
-

Studies

Howest - Digital Arts & Entertainment (Kortrijk, Belgium)

Bachelor Independent Game Production 2022-2025

Athena Secondary (Ostende, Belgium)

Science, Engineering & Maths 2016-2022
